

What To Do Right After You Pick An Item Up

1. **Clean It Up** - Look at the item, does it need to be dusted, polished, vacuumed, do what you can to make the item look great.
2. **Stage It** - Make it look good! Place it where there is light, make it look like an essential part of the room. Don't put furniture on the grass, in the snow or next to a pile of garbage, that will make buyers think your item is also garbage. Be detailed.
3. **Pictures** - Make your new piece the feature of your photo. Make sure your photo is clear/high quality. Don't be afraid to (reasonably) filter your photos to enhance your product, but don't waste too much time on that.
4. **Post** - Use one of our templates and get that item online as soon as you can! Faster you move, faster it sells.
